

Price of stranded power optical cable

Article Overview

Stranded power optical cables, such as OPGW or hybrid fiber optic cables, typically range from \$1 to \$6 per foot depending on fiber count, materials, and design specifications.

Pricing Overview

The cost of stranded power optical cables depends on several factors:

- **Fiber Count:** Cables with more optical fibers (e.g., 24, 36, 48, 72 cores) are more expensive due to increased materials and manufacturing complexity .
- **Materials:** OPGW cables often use aluminum-clad steel (ACS) or aluminum alloy for strength and conductivity. Stainless steel tubes or hybrid designs with multiple layers of stranded wires increase durability and cost .
- **Cable Diameter and Design:** Larger diameters, higher tensile strength, and specialized stranding (double or triple layers) for high-voltage or long-distance applications raise the price .
- **Installation Type:** Aerial installation is generally less expensive than underground or specialized indoor/outdoor runs .

Typical Price Ranges

- **Wholesale Material Costs:** For bulk purchases, fiber optic cable materials alone can range from \$0.09 to \$1.52 per foot .
- **Retail or Pre-Terminated Cables:** Prices for pre-terminated or hybrid cables with power conductors can range from \$1 to \$6 per foot, depending on fiber count and c...
