

Price of surge protection installation method for distribution boxes

Article Overview

Installing surge protection in a distribution box typically costs between \$200 and \$2,500, depending on device type, installation complexity, and panel requirements.

Cost Breakdown

Device Type:

- Point-of-use surge protectors (outlet-level) are the least expensive, generally ranging from \$95 to \$500 for residential applications, depending on joule rating and number of outlets .
- Whole-home or panel-mounted surge protectors installed in a distribution box typically cost \$300 to \$1,200 for standard units, with high-end or multi-circuit systems reaching \$2,500 or more . Installation Costs:
 - Labor is a significant factor, especially if the installation requires panel upgrades, rewiring, or permits. Simple installations on newer panels are less expensive, while older or complex panels increase labor costs .
 - Typical labor rates vary by region but can add \$100 to \$500 to the total project cost. Additional Factors:
 - Amperage rating and number of circuits served by the distribution box can affect pricing .
 - Quality and brand of the surge protector influence cost; certified, high-performance devices are more expensive but offer better reliability .
 - Outdoor or weather-resistant enclosures may carry a premium if the distribution b...
