

Price quote for Swedish steel plate explosion-proof distribution boxes

Article Overview

Explosion-proof stainless steel distribution boxes typically range from \$500 to over \$3,000 depending on size, material, and certification.

Price Overview

The cost of an explosion-proof distribution box made from stainless steel (AISI 304L or 316L) varies widely based on several factors:

- **Size and complexity:** Small junction boxes for low-voltage terminations or compact installations generally start around \$500-\$800, while larger distribution enclosures for industrial or offshore applications can exceed \$2,500-\$3,000 .
- **Material grade:** Marine-grade 316L stainless steel, which offers superior corrosion resistance, is more expensive than 304L stainless steel .
- **Certification:** ATEX, IECEx, and UL certifications for hazardous areas add to the cost. Enclosures designed for Zone 1 or Zone 2 gas areas or Zone 21/22 dust areas require reinforced construction and certified components, increasing the price .
- **Customization:** Pre-drilled cable entries, hinged doors, internal terminal blocks, and other custom features can further raise the cost .

Typical Applications

These enclosures are used in industrial, chemical, marine, and offshore environments where explosive gases or dust may be present. They are designed to contain intern...
