

Purchase communication optical cables

Article Overview

Fiber optic cables are essential for high-speed, long-distance data transmission, and can be purchased from specialized suppliers like DigiKey, Corning, and NewYork Cables.

Types of Fiber Optic Cables

Single-mode fiber (OS2) is ideal for long-distance communication with minimal signal loss, commonly used in telecommunications, FTTP/FTTH, and data centers . Multimode fiber (OM1, OM2, OM3, OM4) is cost-effective for shorter distances, such as in-building networks, equipment interconnects, and high-speed LAN installations . Cables can be terminated with various connectors and ferrules to ensure compatibility with computers, cameras, printers, hubs, and telecommunication devices .

Cable Construction and Environment

Fiber optic cables come with different jackets and ratings to suit installation environments. Options include plenum, riser, LSZH (Low Smoke Zero Halogen), aerial, duct, direct buried, and microduct designs . Outdoor cables are engineered to withstand environmental extremes, while indoor cables must meet flame-retardant standards . Ribbon cables offer higher fiber counts and density, suitable for future-proofing networks .
