

Qatar electrical distribution box companies

Article Overview

DELTA series and Al Bidda Switchgear distribution boxes are among the most recognized electrical distribution solutions in Qatar.

Popular Distribution Boxes in Qatar

DELTA Series Distribution Boxes are widely used in Qatar for both indoor and outdoor applications. They feature high-quality PC/ABS enclosures tested according to IEC/EN 62208 standards, offering high impact resistance, thermal stability, dielectric strength, UV and chemical resistance, and excellent insulation properties. These boxes are modular, allowing horizontal or vertical combinations to create custom setups for industrial, commercial, and residential applications. Al Bidda Switchgear is a leading Qatari manufacturer providing low-voltage (LV) and medium-voltage (MV) switchgear and distribution boxes. Their products are used in major infrastructure projects, including Qatar Rail, stadiums, ports, and commercial buildings. Al Bidda's distribution boxes and switchgear are designed for overload and short-circuit protection, ensuring safety and reliability in critical electrical systems. Other notable suppliers include Malik Electrical and Cigale Power, which provide a range of distribution boxes, ATS panels, synchronization panels, and temporary power solutions for construction sites, events, and industrial projects. These boxes often include powerlock connectors, rated cables, and modular setups for flexible deployment.
