

Recommended Intelligent Spectrometer in Tunisia

Article Overview

For reliable and advanced spectrometry in Tunisia, consider digital visible spectrophotometers from Laboid International, handheld Raman analyzers like Metrohm MIRA P, and modular FT-NIR systems such as BUCHI NIRFlex N-500.

Digital Visible Spectrophotometers

Laboid International offers Digital Visible Spectrophotometers that are widely used in research, industrial, and clinical laboratories in Tunisia. These instruments are known for their user-friendly interface, precise measurements, durability, and compliance with industry standards. They are suitable for UV/Vis absorbance measurements, concentration analysis, and routine laboratory applications, making them ideal for both educational and professional settings .

Handheld Raman Spectrometers

For rapid, non-destructive material analysis, the Metrohm Instant Raman Analyzer (MIRA P) is a high-performance handheld spectrometer available in Tunisia. It is particularly effective for pharmaceutical verification, chemical identification, and quality control, offering portability and fast results without sample preparation .

FT-NIR and Multi-Gas Spectrometers

The BUCHI NIRFlex N-500 is a modular FT-NIR spectrometer suitable for quality cont...
