

Rwanda Smart Patch Panel with Low Loss

Overview

Optical fiber patch panel/rack mounted/wall mounted (L*W*H) 482*300*45mm
Features: The shell is high intensified & insulated material, thus having excellent mechanic performance It is solid and durable Fiber input: 4 Adapters output: 12core or 24 core or 48 core Strength core. Optical fiber patch panel/rack mounted/wall mounted (L*W*H) 482*300*45mm Features: The shell is high intensified & insulated material, thus having excellent mechanic performance It is solid and durable Fiber input: 4 Adapters output: 12core or 24 core or 48 core Strength core. A smart patch panel is an intelligent network infrastructure component that enables real-time monitoring, automated documentation, and enhanced control over physical layer connections in data centers and enterprise networks. These advanced systems improve reliability, reduce downtime, and. A PCU (Panel Control Unit) is equipped at the front of the patch panels and scans the area in front of each port. Usage of patch cord is only needed for connecting non vertical ports. R3241010 - SMART CLASSix. MapIT G2 integrates the powerful combination of innovative Smart Patch Panels, user-friendly Master Control Panels and EagleEye™ software to provide real-time tracking and reporting of network-wide physical layer activity. The system continuously monitors your network, increasing physical layer.
