

# Samoa Distribution Box Wiring

## Article Overview

In Samoa, all power distribution box wiring must be installed by a licensed electrician following EPC standards and local regulations.

### Overview of Power Distribution in Samoa

Samoa's electrical network includes low-voltage distribution lines, substations, and prefabricated distribution boxes (ZBW type), which integrate high-voltage switchgear, transformers, low-voltage switchgear, and metering devices in one unit . These distribution boxes are designed for urban, residential, and industrial applications, operating at 10/0.4 kV with a 50 Hz frequency . The system upgrades in Samoa have included thousands of kilometers of low-voltage distribution lines and multiple substations to improve reliability and safety .

### Wiring Requirements and Safety

- **Licensed Electricians Only:** EPC mandates that all wiring to buildings and distribution boxes must be performed by licensed electricians . This ensures compliance with safety standards and prevents hazards such as short circuits or overloads.
- **Permits and Inspections:** Before wiring, a licensed electrician must apply for a new connection permit on your behalf. EPC conducts a pre-inspection survey to determine materials and costs, followed by a final inspection after installation to ensure safety and regulatory compliance .
- **Connection to the Grid:** Once wiring is approved and inspected, EPC installs the electrical meter and connects the building or distribution box to the grid. This process ensures proper integration with Samoa's low-voltage network ...
