

Secondary distribution box protection dimensions 6

Article Overview

Secondary distribution boxes typically range in size from compact enclosures around 65 x 65 mm to larger industrial cabinets, with protection ratings from IP2X to IP65 or NEMA-rated for outdoor use.

Dimensions

Secondary distribution boxes come in a variety of sizes depending on the application and the number of circuits they serve. Standard enclosures for industrial or general-purpose use can range from 65 x 65 mm up to 361 x 254 mm, with multiple cover heights available . Larger stainless steel or heavy-duty distribution cabinets can exceed 120 mm in height and are often customizable to meet specific installation requirements . The internal layout typically includes mounting plates for circuit breakers, busbars, and terminal blocks.

Protection Ratings

Protection ratings ensure safety against dust, water, and accidental contact:

- IP Ratings: Commonly, high-voltage parts inside the box are protected to IP65, while the enclosure itself may have a minimum of IP2X for safe operation .
- NEMA Ratings: For outdoor or harsh environments, boxes may be NEMA-rated, providing resistance to weather, dust, and corrosion .
- Material Considerations: Stainless steel (1.4301 or 1.4404) is often used for extre...
