

Self-inspection items for building corridor cable trays

Article Overview

Self-inspection of building corridor cable trays should cover material verification, structural integrity, load-bearing capacity, fire resistance, grounding, and proper installation according to approved drawings and standards.

Key Self-Inspection Items

1. Material Verification

- Confirm all cable trays, ladders, and accessories match approved material submittals and specifications .
 - Inspect for surface damage, corrosion, or deformities; reject and document any non-compliant materials .
 - Ensure materials are stored properly, protected from moisture, sunlight, and mechanical damage .
- #### 2. Documentation and Preparation
- Review approved shop drawings and installation specifications for tray routes, lengths, and clearances .
 - Verify material certificates, quality reports, and calibration of inspection tools such as vernier calipers, torque wrenches, and ultrasonic detectors .
 - Ensure all tools and equipment comply with contract requirements .
- #### 3. Structural Integrity
- Inspect trays for deformation, rust, cracks, or other physical damage .
 - Check connectors, bolts, nuts, and fasteners for tightness and proper installation .
 - Verify tray dimensions, spacing, and alignment with design specifications
