

Singapore Dual-Core Temperature Measuring Optical Cable Installation Manufacturer

Article Overview

Power Technologies and Masstron are leading providers of dual-core temperature measuring optical cables and installation services in Singapore.

Key Manufacturers and Suppliers

1. Power Technologies™ Power Technologies offers a range of fiber optic sensing cables designed for distributed temperature sensing (DTS) and fiber Bragg grating (FBG) applications. Their dual-core optical cables, such as the FOC-120A and FOC-200A, feature a double-layer stainless steel armored sheath, providing high tensile strength, torsion-proof, waterproof, and moisture-proof properties. These cables are suitable for harsh environments and critical infrastructure monitoring, including busways, LV switchboards, power cables, tunnels, pipelines, and wind turbines. The system supports 24/7 real-time monitoring with high accuracy and fast update rates, ensuring continuous temperature measurement without downtime for maintenance . 2. Masstron Founded in Singapore in 1995, Masstron provides total communication solutions, including the manufacturing of fiber optic cables, jumper cables, and on-site termination and testing services. They cater to industries such as industrial automation, process control, telecommunications, and research institutions. Masstron's services include installation, testing, and maintenance of fiber optic systems, making them a reliable partner for dual-core temperature measuring optical cable deployment . 3. Additional Suppliers Other companies listed on B2B marketpl...
