

Situation of explosion-proof electrical distribution boxes in Vietnam

Article Overview

Explosion-proof electrical distribution boxes in Vietnam are widely used in high-risk industrial environments, designed to meet international and national safety standards, and are increasingly compact, durable, and integrated with modern automation systems.

Market Overview

The explosion-proof equipment market in Vietnam is valued at around USD 140 million and is growing due to the expansion of industries such as oil and gas, petrochemicals, mining, and chemical processing . Key urban centers like Ho Chi Minh City, Hanoi, and Da Nang dominate the market because of their concentration of industrial facilities and refineries . The market growth is driven by regulatory compliance, workplace safety awareness, and adoption of certified electrical systems .

Technical Standards and Compliance

Explosion-proof electrical boxes in Vietnam comply with international standards such as IECEx and ATEX, as well as Vietnamese regulations like QCVN 01:2020/BCT . These standards ensure that the enclosures can contain internal explosions and prevent ignition of surrounding gases or dust, maintaining safety in hazardous zones . The boxes are designed to isolate sparks, heat, and fire inside the enclosure, preventing propagation to the external environment
