

Specifications for Professional Explosion-Proof Distribution Boxes in El Salvador

Article Overview

Explosion-proof distribution boxes in El Salvador are available in various models and specifications, designed for hazardous areas with ATEX, IECEx, and NEMA certifications, suitable for gas, dust, or mixed explosive environments.

Key Specifications

Explosion-proof distribution boxes are engineered to contain internal explosions and prevent ignition of surrounding flammable gases, vapors, or dusts, ensuring safety in hazardous industrial environments . Common specifications include:

- **Materials:** Stainless steel (AISI 304L, 316L), GRP (glass-reinforced polyester), or coated metals for corrosion resistance and durability .
- **Voltage Ratings:** Low-voltage options typically range from 380V to 660V AC, with frequency compatibility of 50–60Hz .
- **Temperature Range:** Components can withstand extreme temperatures, sometimes as low as -40°C .
- **Control Elements:** Configurable push buttons, switches, LED indicators, voltmeters, and ammeters, often mounted on the cover panel for space efficiency .
- **Hazardous Area Zones:** Suitable for Zone 1, 2, 21, and 22, covering both gas and dust environments .
