

Standard Price of Busbar Wiring in Distribution Boxes

Article Overview

Busbar wiring for distribution boxes typically ranges from \$10 to \$100+ per unit depending on material, size, and fabrication complexity.

Factors Affecting Busbar Prices

- **Material:** Copper busbars are more expensive than aluminum due to higher conductivity and durability, while aluminum requires larger cross-sections for the same electrical load, affecting cost .
- **Dimensions and Cross-Section:** Larger busbars with higher current ratings require more material, increasing the price .
- **Fabrication and Customization:** Cutting, bending, punching, plating, insulation, and additional tap-off points or joints add to labor and manufacturing costs . Custom designs or insulated busbars are more expensive than standard straight bars.
- **Installation and Labor:** Mounting, connecting terminals, and ensuring proper short-circuit ratings contribute to the overall cost .
- **Bulk Orders and Freight:** Purchasing in bulk can reduce per-unit costs, but shipping, import duties, and local taxes may affect the final price .

Typical Price Ranges

- **Standard copper busbars:** \$20-\$50 per meter for basic distribution boxes.
- **Aluminum busbars:** \$10-\$30 per meter, depending on cross-section and current rating.
- **Insulated or custom busbars:** \$50-\$100+ per unit due to additional fabrication an...
