

Standard price for installation of distribution boxes

Article Overview

Installing a distribution box typically costs between \$1,200 and \$6,000 depending on amperage, location, and complexity.

Cost Breakdown

1. **Distribution Box Price:** The cost of the box itself varies widely based on material, capacity, and features. Basic residential units can start around \$200-\$500, while industrial-grade or weatherproof boxes with advanced components can reach \$2,000 or more . Materials such as ABS plastic are cheaper, whereas powder-coated steel or stainless steel enclosures command higher prices . Smart monitoring, surge protection, and digital displays can further increase costs .
2. **Installation Labor:** Labor is often the largest portion of the total cost. For a standard home installation, expect 6-16 hours of work, depending on whether the box is indoor or outdoor, the amperage, and wiring complexity . Labor rates vary by region, with coastal metropolitan areas typically 5-15% higher than the national average .
3. **Permits and Additional Costs:** Permits may be required, and additional costs can arise from conduit rerouting, structural modifications, or upgrading the service entrance. A mid-range outdoor upgrade with a weatherproof enclosure and new meter socket can cost \$2,800-\$4,500, while a full-service premium installation with complex routing and enhanced safety features can reach \$4,500-\$8,000
