

Sudan optical cable nitrogen generator manufacturer

Article Overview

Atlas Copco, South-Tek Systems, and OXYMAT are key providers of nitrogen generators suitable for optical cable applications in South Sudan.

Atlas Copco South Sudan

Atlas Copco offers on-site nitrogen generation systems that are highly suitable for optical cable manufacturing and installation, where controlled nitrogen atmospheres are critical to prevent oxidation and ensure cable integrity. Their NM series portable nitrogen generators can produce nitrogen with purities up to 99%, and the systems are designed for easy commissioning, intuitive operation, and energy efficiency. Atlas Copco also provides portable air compressors and boosters, enabling a complete nitrogen supply solution for fiber optic cable projects. Their global service network ensures technical support and maintenance in South Sudan.

South-Tek Systems

South-Tek Systems specializes in mission-critical nitrogen generators that deliver high-purity nitrogen at lower operational costs. Their systems are suitable for telecommunications and optical fiber applications, providing precise control over nitrogen supply, which is essential for cable pressurization, purging, and storage. South-Tek emphasizes reliability and operational readiness, making them a strong option for infrastructure projects in challenging environments....
