

Sweden Sells 24-Core Fiber Optic Cable for Smart Buildings

Article Overview

Sweden offers high-quality 24-core fiber optic cables designed for indoor smart building installations, providing robust, high-bandwidth connectivity with safety and environmental compliance.

Product Overview

The 24-core fiber optic cable available in Sweden is a single-mode LC-LC breakout cable suitable for indoor use in smart buildings . It features 24 individual fiber cores organized in tubes with aramid yarn reinforcement, providing strength and durability during installation. The cable is encased in a black protective jacket with a flexible, tear-resistant nylon pulling aid on both ends, ensuring ease of handling and installation .

Safety and Environmental Features

These cables are LSZH (Low Smoke Zero Halogen), meaning they produce minimal smoke and no toxic gases in case of fire, enhancing safety in indoor environments . This makes them particularly suitable for smart buildings, where fire safety and environmental compliance are critical.

Applications in Smart Buildings

The 24-core fiber optic cable is ideal for high-speed data transmission in smart buil...
