

Temporary distribution box side socket

Article Overview

Temporary distribution boxes feature side sockets designed for flexible, safe, and generator-compatible power distribution in outdoor or construction settings.

Socket Types and Configuration

Temporary distribution boxes often include a variety of side sockets to accommodate different power sources and equipment needs. Common configurations include:

- L6-30R and L14-30R sockets for 30A generators, suitable for small to medium equipment.
- 50A SS2-50P interfaces for high-power generators, supporting large tools or multiple devices simultaneously.
- GFCI-protected 20A sockets (typically 2-6 per unit) for standard equipment requiring ground-fault protection.
- TT-30R sockets for RV or specialized applications, providing additional flexibility .

Having multiple socket types on one side allows users to connect different generators or devices without extra adapters, making setup faster and more efficient .

Safety and Durability Features

Side sockets on temporary distribution boxes are designed with safety in mind:

- UL or ETL-certified outlets ensure compliance with electrical safety standards.
- Built-in overload protection prevents damage to connected devices.
- Weatherproof enclosures (NEMA 3 or IP44/IP67 ratings) allow safe outdoor use, ev...
