

Terminal Box Fiber Optic Cable Termination

Article Overview

A Fiber Termination Box (FTB) is used to terminate, splice, and manage fiber optic cables, providing a secure interface between incoming cables and outgoing pigtails or patch cords.

Purpose of a Fiber Termination Box

A Fiber Termination Box serves as a centralized junction point in fiber optic networks, connecting incoming feeder cables to outgoing pigtails or patch cords. It protects fibers from bending, dust, and accidental handling, organizes cables to prevent entanglement, and ensures signal integrity by maintaining proper alignment and bend radius . FTBs are widely used in FTTH, FTTB, FTTC, and data center networks .

Components of an FTB

- **Housing:** Durable, impact-resistant casing, often with IP65/IP68 ratings for outdoor use, protecting internal components from environmental damage .
- **Internal Components:** Includes splice trays, fiber guides, and adapters for SC, LC, FC, or ST connectors .
- **Fiber Protection Elements:** Sleeves, cassettes, and guide posts to secure fibers and store excess lengths safely .

Types of Fiber Termination Boxes

- **Straight-through Terminal Box:** Single entry for the incoming line....
