

The electrical control box is in the bedroom

Article Overview

An electrical control box, or breaker panel, is rarely placed in modern bedrooms but may exist in older homes, typically on a wall in an out-of-the-way area, following safety and code requirements.

Typical Locations

In older homes or specific renovation layouts, an electrical panel may be found in a bedroom, though this is uncommon. Possible locations include:

- On a wall in a corner or less-used area of the bedroom
- Inside a closet (though modern codes prohibit this due to fire risk)
- Behind furniture or cabinets that allow access but keep it out of sight
- Near entry walls for easier access to wiring circuits

Safety and Code Considerations

The National Electrical Code (NEC) governs panel placement:

- Panels must not be installed in bathrooms, over stairways, or inside closets with stored clothing due to fire hazards
- The center of the highest breaker should be no more than 6'7" above the floor, and the panel should be at least 4' off the ground
- A clear workspace of 30 inches wide and 3 feet in front of the panel is required for...
