

The outgoing wire from the distribution box returns to the distribution box

Overview

Wiring Direction: Wiring between the main circuit breaker and each branch circuit breaker in the box generally goes on the left, and the wiring out of the distribution box generally goes on the right. **Binding Requirements:** The wires should be bound with plastic ties. **Wire color:** The neutral wire is blue, and the color of the phase wire (A phase is yellow, B phase is green, and C phase is red). In this video, we'll walk you through the process of wiring a home distribution box with a detailed connection diagram. What is Distribution Board?

Distribution board. Distribution Board or DB is an electricity supply system or a common enclosure that distributes the electrical power feed into subcircuits. It includes isolator, RCCB (Residual current circuit breaker) or RCD (Residual-current device) devices, protective fuses or MCB's (Miniature Circuit Breaker). Understanding the wiring diagram of an electrical panel box is essential for electricians and homeowners alike, as it allows them to troubleshoot any electrical issues, carry out repairs, or make additions to the system. It provides convenience for protection, control and maintenance.
