

There are fiber optic cables in the yard

Article Overview

If you have a fiber optic cable in your yard, it's important to know its location and take precautions to avoid damage during yard work or landscaping.

Identifying and Protecting the Cable

Before doing any digging, mowing, or landscaping, locate the fiber cable. Most providers bury the cable at a specific depth and along a defined path across your property, but if you're unsure, contact your ISP for assistance in locating it . Marking the cable path clearly helps prevent accidental damage.

Safe Yard Practices

- Avoid digging near the cable: Even if the cable is buried, heavy digging can disturb the soil and damage it .
- Be careful when mowing: Pay attention to areas where the cable may be near the surface or along lawn edges. Move the line out of your path if it is above ground temporarily .
- Plan landscaping carefully: When planting trees, shrubs, or garden beds, maintain a safe distance from the cable path to prevent accidental cuts or punctures .

Installation Considerations

Fiber optic cables can be installed aerially on utility poles or buried underground. Aerial installations typically do not require yard digging, while underground installations may involve a small trench from the street to your home . Modern met...
