

Uruguay Optical Cable Line

Article Overview

Uruguay's optical cable network is primarily managed by state-owned utilities UTE and Antel, with ongoing expansion, legal regulation, and international trade in fiber optic cables.

Infrastructure and Management

Uruguay's fiber optic network is largely overseen by UTE (Administración Nacional de Usinas y Transmisiones Eléctricas) and Antel, the state-owned telecommunications company. UTE maintains the physical infrastructure, including aerial and underground lines across low, medium, high, and extra-high voltage networks, while Antel provides fiber optic services to homes and businesses . The network includes both subterranean cables and aerial lines, with classifications ranging from 0.23 kV to 150 kV . Antel provides an interactive map to check fiber availability and ongoing installation zones for residential and commercial users .

Legal and Regulatory Issues

Recently, UTE announced the removal of fiber optic cables installed illegally by private companies on its infrastructure. These unauthorized installations, sometimes linked to foreign groups like Argentina's Grupo Clarín, were found in departments such as Salto and Paysandú. The removal is supervised by the Ministry of Industry, Energy, and Mining, and may result in sanctions against the companies involved . This highlights the importance of regulatory compliance in Uruguay's optical cable sector....
