

Waterproof adhesive on the distribution box

Article Overview

Waterproof adhesives and gels can protect distribution boxes from moisture, water ingress, and environmental damage, ensuring long-term safety and reliability.

Types of Waterproof Adhesives and Gels

1. Self-Adhesive Waterproof Labels For marking and minor protection, self-adhesive waterproof labels are durable, abrasion-resistant, and weatherproof. They are ideal for labeling circuit breakers and distribution boxes outdoors, maintaining readability in all conditions without tools or additional sealing materials (DIYEAH) . 2. Electrical Waterproof Gels Electrical insulating gels, such as IPGel Duo (IP68) or IPGel Mono (IP67), are pourable two-component gels that seal connections inside junction boxes. They prevent water, liquids, and solids from reaching electrical contacts, reducing the risk of short circuits, equipment damage, or fire hazards. These gels are suitable for outdoor or high-moisture environments . 3. Silicone-Based Gels Two-component silicone gels, like SI8706, cure into a transparent elastomer that isolates moisture and pollutants from circuit boards. They provide dielectric insulation, stress relief, and self-healing properties, making them suitable for high-voltage or sensitive electronic modules inside distribution boxes . 4. Pre-Filled Gel Boxes (Gelbox) Products like the WAGO Gelbox are pre-filled with silicone-free gel and designed for splicing connectors. They offer IPX8-rated protection, sealing only the connection points without permanently encapsulating the entire distribution box. This allows easy re-wiring and repeated use while maintaining moisture protection . 5. Power Gel for Extreme Conditions Power Gel is a flame-retardant, environmentally safe gel for...
