

What are some common brands of pigtail fiber

Article Overview

Popular brands of fiber optic pigtails include FS, Belden, Lettel, JPT, and TELMOR, offering a range of single-mode, multimode, and specialty pigtails for various applications.

Key Brands and Offerings

- FS (Fiberstore): Provides single-mode and multimode pigtails, available in simplex or multifiber configurations. FS pigtails support fusion and mechanical splicing, with customizable fiber counts, lengths, connector types, and cable diameters. They offer tight-buffered and ribbonized options for data centers, in-building networks, and field installations .
- Belden: Offers traditional fusion splice-on connectors and mass fusion pigtails. Their products include factory-polished pigtails with single or 12-fiber ribbonized configurations, suitable for harsh environments and high-volume splicing .
- Lettel, JPT, TELMOR: These brands are listed on industrial supplier platforms like DirectIndustry, providing SC/APC, SC/UPC, and other connector types. They often use G.657A fiber for reduced bend radius and low attenuation, suitable for FTTx and last-mile networks .

Types and Specifications

- Fiber Types: Single-mode (OS2) for long-distance and FTTH, multimode (OM3/OM4) for data centers and in-building networks
