

What are the dimensions of a fiber optic cable box for home delivery

Article Overview

Residential fiber optic cable boxes typically measure around 8-12 inches in height, 6-10 inches in width, and 2-4 inches in depth, depending on the model and fiber capacity.

Typical Size and Design

Fiber optic cable boxes for home delivery, also called fiber termination or distribution boxes, are designed to house optical network units (ONUs), splices, and slack fiber while providing protection from environmental factors . Most residential boxes are compact enough to mount on walls or near utility panels, yet large enough to allow easy access for installation and maintenance . Common dimensions for these boxes are approximately:

- Height: 8-12 inches (20-30 cm)
- Width: 6-10 inches (15-25 cm)
- Depth: 2-4 inches (5-10 cm) These dimensions accommodate standard fiber adapters, splice trays, and slack storage while maintaining a neat and organized layout .

Material and Mounting

Boxes are typically made from weather-resistant plastic or metal, suitable for indoor or outdoor installation . They include mounting slots or threaded holes for secure at...
