

What are the main types of optical fiber cable connectors

Article Overview

Optical fiber cable connectors are generally categorized by fiber type, connector style, coupling mechanism, and application, with common types including SC, LC, ST, FC, and MTP/MPO.

Classification by Fiber Type

Optical fiber connectors are divided into single-mode and multimode types. Single-mode connectors are designed for long-distance, high-bandwidth applications, while multimode connectors are used for shorter distances and lower bandwidth networks .

Classification by Connector Style

Connector style refers to the physical design and ferrule size:

- SC (Subscriber Connector): Square-shaped, push-pull design, widely used in FTTH and data centers .
- LC (Lucent Connector): Miniaturized version of SC with a 1.25 mm ferrule, ideal for high-density applications .
- ST (Straight Tip): Bayonet-style twist-lock, common in legacy networks and industrial environments .
- FC (Ferrule Connector): Threaded coupling, suitable for high-vibration or precision measurement setups .
- MTP/MPO (Multi-Fiber Push-On/Pull-Off): High-density connectors for multi-fiber arr...
