## Overview

A fiber wall socket (also called an optical termination outlet or FTTH outlet) is the critical endpoint where your home's fiber optic cable connects to the Optical Network Terminal (ONT). An optical fiber connector is used to join optical fibers where a connect/disconnect capability is required. The fiber. As fiber-to-the-home (FTTH) and fiber broadband continue to replace traditional copper infrastructure, the Fiber Optic Socket Wall Outlet has become an essential component of modern optical networks. This article explains the delicate process of fitting a connector to a fiber, which involves cleaving, precise positioning, and. In the development of fiber optic technology, many companies and individuals have invented the "better mousetrap" - a fiber optic connector that was lower loss, lower cost, easier to terminate or solved some other perceived problem.
