

What to do if your router's fiber optic cable turns red

Overview

To fix a red LOS light on the router: Start by checking that the fiber or WAN cable is firmly connected and undamaged (no sharp bends or crushing), then clean the fiber connector if it looks dusty. When it's green and steady, everything is fine. However, when it blinks red or stays solid red, it signifies a Loss of Signal, a problem preventing your router from communicating. A red LOS (Loss of Signal) light on your router or ONT usually indicates that the device is not receiving an optical signal from the fiber network. In many cases, the issue is temporary and can be fixed with a few basic checks before you call support. Routers typically have. Fiber optic networks are celebrated for their speed and reliability, but even the best systems can encounter problems.
