

Where can I find fireproof cable trays in the Netherlands

Article Overview

Fireproof cable trays in the Netherlands include metal ladder trays, perforated and closed trays, and glass fiber reinforced polyester systems, all certified for fire resistance under CPR/NEN 8012 standards.

Metal Cable Trays

Metal trays, such as those from Stago, are widely used for fire-resistant installations. They are available in perforated, reinforced, and closed designs, with double return flanges and reinforced constructions for high load capacity and cable safety. These trays are certified according to DIN 4102-12 for fire resistance classes E30, E60, and E90, ensuring circuit integrity during fire events. Standard finishes include industrial black, modern white, or custom RAL colors, and they are suitable for commercial buildings, industrial sites, and data centers .

Glass Fiber Reinforced Polyester Trays

Manufacturers like Gouda Holland offer Poly (Niedax EBO) trays, made from glass fiber reinforced polyester, which is halogen-free and highly resistant to UV, corrosion, and chemicals. These trays are lightweight, easy to handle, and available in light, medium, and heavy-duty versions. They can be produced using pultrusion or press molding techniques, and are suitable for industrial, marine, and machine-building applications
