

Where can I get my fiber optic fusion splicer maintained

Article Overview

You can have your fiber optic fusion splicer maintained at specialized service centers like Fibreplus, FORC Fiber, or Legacy Fiberoptics, which offer cleaning, calibration, repair, and performance verification for multiple brands.

Professional Service Centers

Fibreplus provides calibration and repair services for Sumitomo, VIAVI, and other optical testing and splicing equipment. Their in-house service includes inspection, cleaning, calibration, performance verification, electrical safety testing, and software updates. They also offer interim service verifications and can send units to manufacturers for in-depth repairs if needed, with a typical turnaround of 3-5 days . FORC Fiber offers maintenance for a wide range of fusion splicer brands including Fujikura, INNO Instrument, Sumitomo, Fitel, Corning, and Ericsson. Their services include fusion splicer cleaning, calibration, and repair, as well as maintenance for fiber optic cleavers . Legacy Fiberoptics specializes in repair and calibration for both current and older splicer models. Their process involves cleaning, testing, troubleshooting to the component level, and final quality checks before returning the unit. They emphasize sending the full splicer setup, including cleaver, power cord, and batteries, to ensure comprehensive evaluation .

Routine Maintenance Tips

Even with professional servicing, regular in-field maintenance is crucial. Key practic...
