

Where in Italy can I buy fire-resistant cable trays

Article Overview

You can find fire-resistant cable trays in Italy from manufacturers like EBO Systems, Spina Group, Beerenberg, HERMI, and Meka Pro, offering fiberglass, epoxy-coated, and tested fire-rated solutions.

Key Suppliers and Options

EBO Systems produces pressed and pultruded fiberglass cable trays that are self-extinguishing with low smoke emission, suitable for outdoor, humid, or chemically aggressive environments. Their trays are lightweight, corrosion-resistant, and allow normal heat dissipation while protecting cables from fire. Spina Group (Schiavetti Tekno) offers a wide range of cable trays including stainless steel, galvanised, and wire-mesh types. Their systems include closed, perforated, and ladder trays, with optional covers for fire protection and compliance with European (EN) and UL standards. Beerenberg provides Benarx Epoxy Cable Trays, designed for passive fire protection of critical power and signal cables. These epoxy-coated steel trays maintain cable integrity during fire, are robust, reusable, and can be installed in all weather conditions. HERMI Solutions specializes in fire-resistant cable paths with standard or lightweight surface cable trays. Their team offers guidance to select the most suitable solution for specific installation needs. Meka Pro manufactures fire-resistant cable support systems tested according to EN 1363-1 standards, ensuring that electrical circuits remain functional during fire events. Their E90 and E60 rated systems provide reliable protection for critical installations, with a wide range of widths and materials
