

Where is the Kiribati-Bahamas fiber optic cable located

Overview

The long-stalled undersea cable that will interlink Micronesian islands is expected to be up and running by November, following the fiber optic cable landing in Kosrae, which completed the three-segment infrastructure. The Submarine Cable Map is a free and regularly updated resource from TeleGeography. Telecom Egypt and Jordan's NaiTel completed the Coral Bridge subsea cable, the first direct link between the two countries. The arrival of the East Micronesia Cable in South Tarawa has marked a major milestone in Kiribati's digital development journey, with the undersea telecommunications cable set to transform connectivity across the island nation., Australia and Japan, the East Micronesia Cable will. The East Micronesia Cable project is a four-year project that commenced implementation in 2022, with an expected delivery date of late 2025. Cable landing stations will be constructed at landing points in each country to facilitate connection to the main cable.
