

XM Distribution Box Product Description

Overview

XM series integrated distribution box/cabinet is suitable for AC frequency 50Hz, rated voltage 220V or 400V single-phase or three-phase five-wire lighting and small power lines, it is used to control, distribute, and meter electrical equipment, and to protect against. XM series integrated distribution box/cabinet is suitable for AC frequency 50Hz, rated voltage 220V or 400V single-phase or three-phase five-wire lighting and small power lines, it is used to control, distribute, and meter electrical equipment, and to protect against. The XM distribution box is suitable for single-phase, three-wire or three-phase five-wire terminal circuits with a rated voltage of 220 or 380V and a single-row load total current of not greater than BOA. As a control and distribution of electrical equipment, it protects overload, short-circuit. XM Low voltage distribution box is sorted into lighting and motor control box, including common type, outdoor type, with observation window. Both recess mounting and indoor wall mounting can be supplied according to customer requirement. Meanwhile, a series of structural dimensions are designed to. The Low Voltage Distribution Box is a compact and reliable solution for secondary power distribution in industrial, commercial, and residential applications. Designed with a robust steel enclosure, it safely houses circuit breakers, fuses, and control devices to manage lighting, motor loads, and. XM series distribution boxes are all metal economical switch boxes, which are widely used in residential buildings, high-grade office buildings, high-grade apartments, industrial and mining enterprises and workshops as indoor lighting distribution and small power distribution equipment in. Detailed description: The switchboard is designed for use in office and administrative buildings, commercial facilities, and residential premises in general AC 50 Hz distribution networks with a rated voltage of 220/380 V.
